YASUGI, S. Differentiation of allantoic endoderm implanted into the presumptive digestive area in avian embryos. A study with organ-specific antigens **80**, 137
ZALIK, S. E. *See* MILOS, N.
ZWAAN, J. *and* KENYON, R. E. Cell replication and terminal differentiation in the embryonic chicken lens: normal and forced initiation of lens fibre formation **84**, 331

Subject Index (Vols 79–84)

Abscission
calcium and polarity in plants: TREWAVAS, SEXTON & KELLY **83 Supplement,** 179
***Acheta domesticus*(See Cricket)**
Actin
changes in distribution during fertilization of mouse egg: MARO, JOHNSON, PICKERING & FLACH **81**, 211
distribution in cytoplasm of mouse 8-cell blastomeres: JOHNSON & MARO **82**, 97
Activation wave
structural basis in egg of *Xenopus laevis:* TAKEICHI & KUBOTA **81**, 1
Actomyosin gel
in *Physarum* shuttle streaming: ODELL **83 Supplement**, 261
Adhesion
of dermal cells during feather primordia development in chick skin: DAVIDSON **84**, 149
Adrenergic cells
differentiation *in vitro* culture of mouse embryo: ITO & TAKEUCHI **84**, 49
Aggregation
between preimplantation embryos and teratocarcinoma-derived cells: LEHTONEN, WARTIOVAARA & REIMA **81**, 17
Aggregation chimaeras
in mouse – investigation of variability: WEST, BÜCHER, LINKE & DÜNNWALD **84**, 309
Aleurone cells
gibberellins and gene control: BAULCOMBE, LAZARUS & MARTIENSSEN **83 Supplement**, 119
Alkaline phosphatase
activity in developing mouse spinal cord: KWONG & TAM **82**, 241
Allantoic endoderm
implanted into presumptive digestive area in chick embryos: YASUGI **80**, 137
Ambystoma mexicanum
cellular contributions to supernumerary limbs: MADEN & MUSTAFA **84**, 233
in vitro development of isolated ectoderm from gastrulae: SLACK **80**, 321
melanoid mutant
pigmentary system: FROST, EPP & ROBINSON **81**, 127
regional biosynthetic markers in early embryonic development: SLACK **80**, 289
response of denervated axolotl arms to delayed amputation: WALLACE **84**, 303
troponin-T in developing hearts: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
wild type
pigmentary system: FROST, EPP & ROBINSON **81**, 105
Amphibia
anuran
role of glycocojugates in migration of germ cells: DELBOS, GIPOULOUX & SAIDI **82**, 119
axolotl
in vitro development of isolated ectoderm from gastrulae: SLACK **80**, 321
morphogenesis of limb blastema – relationship between pattern and form: HOLDER & REYNOLDS **79**, 165
Pleurodeles waltl
blood
cell ontogeny: DEPARIS & JAYLET **81**, 37
Amplification
of ribosomal RNA genes during development: BOSTOCK **83 Supplement**, 7
Amputation
response of denervated axolotl arms: WALLACE **84**, 303
α-Amylase
gene families in wheat: BAULCOMBE, LAZARUS & MARTIENSSEN **83 Supplement**, 119
Antibody
responses and thymus implantation in *Xenopus*: GEARING, CRIBBIN & HORTON **84**, 287
responses during postmetamorphic development in *Xenopus* : LALLONE, CHAMBERS & HORTON **84**, 191
Antigen
differentiation of mouse spermatogenesis: BECHTOL **81**, 93
Antisera
used to study differentiation of allantoic endoderm in avian embryos: YASUGI **80**, 137
Apical ectodermal ridge (AER)
development in chick wing bud: TODT & FALLON **80**, 21
effect on myogenic cell movements in

avian limb bud: GUMPEL-PINOT, EDE & FLINT **80**, 105
induction in chick embryos: CARRINGTON & FALLON **84**, 19
Apolipoprotein
expression by murine yolk sac endoderm: SHI & HEATH **81**, 143
Apoptosis
associated with cavitation in teratocarcinoma-derived embryoid bodies: BOYD, HOOPER & WYLLIE **80**, 63
Archenteron
volume changes during embryogenesis of starfish: KOMINAMI **84**, 177
Area opaca
ultrastructure in gastrulating chick embryos: MILOS, ZALIK, SANDERS & LEDSHAM **83**, 43
Area pellucida
role of elongation in formation of somites of avian embryos: STERN & BELLAIRS **81**, 75
Asialoglycoprotein receptor
on isolated foetal rat hepatocytes: CONTI DEVIRGILIIS, DINI & RUSSO-CAIA **79**, 41
Asterina pectinifera
allocation of mesendodermal cells during early embryogenesis: KOMINAMI **84**, 177
Autonomous cortical activity
in mouse eggs controlled by cytoplasmic clock: WAKSMUNDZKA, KRYSIAK, KARASIEWICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
Avian
embryo
exogenous glycosaminoglycans modulate skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **82**, 25
Axolotl
cellular contributions to supernumerary limbs: MADEN & MUSTAFA **84**, 233
forelimb
regeneration of surgically created mixed-handed limbs: HOLDER & WEEKES **82**, 217
in vitro development of isolated ectoderm from gastrulae: SLACK **80**, 321
larvae
skin–gland spacing pattern: HOLDER & GLADE **79**, 97
limb blastema
relationship between pattern and form: HOLDER & REYNOLDS **79**, 165
melanoid
mutant pigmentary system: FROST, EPP & ROBINSON **81**, 127
regional biosynthetic markers in early embryonic development: SLACK **80**, 289
wild type
pigmentary system: FROST, EPP & ROBINSON **81**, 105

Bacteriophage lambda
a programme for its construction: BRAMMAR & HADFIELD **83 Supplement**, 75
Basement membrane
adhesions during feather primordia development in chick skin: DAVIDSON **84**, 149
labelling in living chick embryo during gastrulation: SANDERS **79**, 113
Beak
of chick embryos – defects caused by retinoic acid: TAMARIN, CRAWLEY, LEE & TICKLE: **84**, 105
Bile duct cells
origin of in mouse embryos: SHIOJIRI **79**, 25
Blastema formation
in planarians: SALÓ & BAGUÑÁ **83**, 63
Blastocyst
trophectodermal processes regulate ICM totipotency expression: FLEMING, WARREN, CHISHOLM & JOHNSON **84**, 63
Blastomere
mouse
distribution of cytoplasmic actin: JOHNSON & MARO **82**, 97
Blood cell ontogeny
role of endoderm in *Pleurodeles waltl*: DEPARIS & JAYLET **81**, 37
Boneless forearms
regeneration in *Xenopus laevis*: KORNELUK & LIVERSAGE **82**, 9
Boundary shortening
a procedure to test contraction in polygonal cell sheet: HONDA *et al.* **83 Supplement**, 313
Budding
of chimaeric hydra from normal and slow-budding strains: TAKANO & SUGIYAMA **80**, 155
Bufo bufo
role of glycocojugates in migration of germ cells: DELBOS, GIPOULOUX & SAIDI **82**, 119

Butterflies
wing patterns
single morphogen as a determining mechanism: BARD & FRENCH **84**, 255

Caenorhabditis elegans
switch genes and sex determination: HODGKIN **83 Supplement**, 103

Calcium
effect on wound healing in rat embryos: SMEDLEY & STANISSTREET **83**, 109
polarity and abscission in plants: TREWAVAS, SEXTON & KELLY **83 Supplement**, 179

Canine
ontogeny of haemopoietic progenitor cells (GM-CFC): NOTHDURFT, BRAASCH, CALVO, PRÜMMER, CARBONELL, GRILLI & FLIEDNER **80**, 87

Cat
embryo development of muscle spindles: MILBURN **82**, 177

Cavitation
of aggregates of chick extraembryonic endoderm cells: MILOS, ZALIK, SANDERS & LEDSHAM **83**, 43

cDNA cloning
in *Chlamydomonas* gene expression induced by flagellar regeneration: SCHLOSS **83 Supplement**, 89

Cell adhesion
in chick segmental plate resulting in meristic pattern: CHENEY & LASH **79**, 1

Cell aggregative behaviour
of rat vibrissa dermal papilla *in vivo* and *in vitro*: JAHODA & OLIVER **79**, 211

Cell behaviour
in a polygonal cell sheet: HONDA *et al.* **83 Supplement**, 313

Cell cycle
analysis of facial mesenchyme in chick embryo: MINKOFF **81**, 49
MINKOFF & MARTIN **81**, 61
in chick embryonic lens differentiation: ZWAAN & KENYON **84**, 331

Cell death
associated with cavitation in teratocarcinoma-derived embryoid bodies: BOYD, HOOPER & WYLLIE **80**, 63
during morphogenesis of digits of duck embryo webbed feet: HURLE & FERNANDEZ-TERAN **79**, 201
during ridge induction in flank ectoderm of chick embryo: CARRINGTON & FALLON **84**, 19
during syndactyly induced by Janus Green B in chick leg bud: FERNANDEZ-TERAN & HURLE **84**, 159
in chick optic cup – evidence for new necrotic area: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241
in development of apical ectodermal ridge in chick wing bud: TODT & FALLON **80**, 21

Cell division
during visual streak formation in the frog *Limnodynastes*: COLEMAN, DUNLOP & BEAZLEY **83**, 119

Cell division
model of using computer topological approach: RANSOM & MATELA **83 Supplement**, 233

Cell interaction
during embryogenesis of starfish: KOMINAMI **84**, 177

Cell lineage
in chimaeric hydra from normal and slow-budding strains: TAKANO & SUGIYAMA **80**, 155

Cell marker
for clonal analysis of mouse extraembryonic endoderm development: GARDNER **80**, 251

Cell motility
models using cytogels: OSTER **83 Supplement**, 329

Cell movement
in developing avian limb bud in presence and absence of AER: GÜMPEL-PINOT, EDE & FLINT **80**, 105

Cell relationships
during aggregation between mouse embryos and carcinoma (EC) cells: LEHTONEN, WARTIOVAARA & REIMA **81**, 17

Chick
blastoderm
effect of microtubule inhibitors on expansion of hypoblast: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273
embryo
cavitation of aggregates of extraembryonic endoderm cells: MILOS, ZALIK, SANDERS & LEDSHAM **83**, 43
cell–cell adhesion in segmental plate: CHENEY & LASH **79**, 1
cell cycle analysis of facial mesenchyme: MINKOFF **81**, 49
MINKOFF & MARTIN **81**, 61
cell death in dorsal part of optic cup: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241

cell replication and differentiation in lens: ZWAAN & KENYON **84**, 331
development of apical ectodermal ridge in wing bud: TODT & FALLON **80**, 21
development of iris – a study using immunocytochemistry: FERRARI & KOCH **81**, 153
differentiation of allantoic endoderm studied with antigens: YASUGI **80**, 137
differentiation of irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
distribution of endocrine cell progenitors in the gut: RAWDON, KRAMER & ANDREW **82**, 129
epithelial induction of osteogenesis in mandibular mesenchyme: VAN EXAN & HALL **79**, 225
connective tissue differentiation in explanted somites: SWALLA & SOLURSH **79**, 243
exogenous glycosaminoglycans modulate skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **82**, 25
haemoglobin and globin synthesis in isolated erythroid cells: SCHALEKAMP & VAN GOOR **84**, 125
intestinal cytodifferentiation *in vitro* of endoderm: ISHIZUYA-OKA & MIZUNO **82**, 163
labelling of basement membrane during gastrulation: SANDERS **79**, 113
miniaturized somites: BELLAIRS & VEINI **79**, 183
motor innervation of proximally rotated wing buds: LAING **83**, 213
myogenic cell movement in presence and absence of AER: GUMPEL-PINOT, EDE & FLINT **80**, 105
ridge induction in flank ectoderm: CARRINGTON & FALLON **84**, 19
role of Hensen's node in somite formation: STERN & BELLAIRS **81**, 75
SEM localization of cell-surface-associated fibronectin in cranium: MEIER & DRAKE **80**, 175
spatially periodic patterns created by mechanical instability: HARRIS, STOPAK & WARNER **80**, 1
upper beak defects after treatment with retinoic acid: TAMARIN, CRAWLEY, LEE & TICKLE **84**, 105

leg bud
syndactyly induced by Janus Green B: FERNANDEZ-TERAN & HURLE **84**, 159

skin
development of feather primordia: DAVIDSON **84**, 149

Chimaeras
between preimplantation embryos and tératocarcinoma-derived cells: LEHTONEN, WARTRIOVAARA & REIMA **81**, 17
in hydra
genetic analysis of developmental mechanisms: TAKANO & SUGIYAMA **80**, 155, mouse
produced by aggregating embryos: WEST, BUCHER, LINKE & DUNNWALD **84**, 309

Chlamydomonas
gene expression induced by flagellar regeneration: SCHLOSS **83 Supplement**, 89

Chloroplast
development in higher plants – expression of Rubisco genes: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163

Chondrogenesis
cell cycle analysis in chick embryo: MINKOFF & MARTIN **81**, 49
in explanted chick somites: SWALLA & SOLURSH **79**, 243

Chorion genes
in *Drosophila* – analysis of transcriptional regulation: KALFAYAN, WAKIMOTO & SPRADLING **83 Supplement**, 137

Chromatophores
in developing wild-type axolotls: FROST, EPP & ROBINSON **81**, 105

Chromosomes
and sex differentiation in eutherians: MÜLLER **83 Supplement**, 41
changes during development: BOSTOCK **83 Supplement**, 7
order – implications for development: HESLOP-HARRISON & BENNETT **83 Supplement**, 51

Ciliates
genomic happenings – gene amplification and diminution: BOSTOCK **83 Supplement**, 7
mutational analysis of patterning of *Tetrahymena* oral structures: FRANKEL *et al.* **82**, 41
FRANKEL *et al.* **82**, 67

Cinematography
of activation in egg of *Xenopus laevis*: TAKEICHI & KUBOTA **81**, 1

Cleavage
DNA replication and gene expression in mouse embryos: BOLTON, OADES & JOHNSON **79**, 139

Cleft palate
parallel with upper beak defects induced by retinoic acid in chick: TAMARIN, CRAWLEY, LEE & TICKLE **84**, 105
Clonal analysis
of development of extraembryonic endoderm in the mouse: GARDNER **80**, 251
Cnidaria
retinoids and pattern formation in a hydroid: MÜLLER **81**, 253
Colour pattern
modification by coldshock in Lepidoptera: NIJHOUT **81**, 287
Compaction
in mouse blastomeres – distribution of cytoplasmic actin: JOHNSON & MARO **82**, 97
in preimplantation mouse embryos and microtubules: MARO & PICKERING **84**, 217
Complement production
in *Xenopus* during postmetamorphic development: LALLONE, CHAMBERS & HORTON **84**, 191
Compound eyes
in reduced-eye mutant of the grasshopper: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Computer modelling
of cell division during development: RANSOM & MATELA **83 Supplement**, 233
Concanavalin A (Con A)
surface binding during fertilization of mouse eggs: MARO, JOHNSON, PICKERING & FLACH **81**, 211
Connective tissue
differentiation in chick explanted somites: SWALLA & SOLURSH **79**, 243
Contractile proteins
in developing heart of *Ambystoma*: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
Control mechanisms
in infective pathways of bacteriophage lambda: BRAMMAR & HADFIELD **83 Supplemeat**, 75
Cortical activity
in mouse eggs controlled by a cytoplasmic clock: WAKSMUNDZKA, KRYSIAK, KARASIEWICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
Cortical histogenesis
in the ferret : MCSHERRY **81**, 239
Coupling junctions
in preimplantation mouse embryos: GOODALL & JOHNSON **79**, 53
Cranial neural crest
localization of fibronectin in chick embryos: MEIER & DRAKE **80**, 175
Crawling
of cells – a model for lamellipodia: OSTER **83 Supplement**, 329
Cricket
structure of supernumerary leg regenerates: FRENCH **81**, 185
Culture
of explanted chick somites – differentiation of connective tissues: SWALLA & SOLURSH **79**, 243
of isolated early mouse inner cell masses: NICHOLS & GARDNER **80**, 225
of rat vibrissa dermal papilla cells: JAHODA & OLIVER **79**, 211
of segmental plate mesoderm of snapping turtle embryos: PACKARD & MEIER **84**, 35
Cuticle
Drosophila
pattern formation in adults after irradiation of larval cells: MADHAVAN & MADHAVAN **82**, 1
Cytochalasin B
effect on wound healing in rat embryos: SMEDLEY & STANISSTREET **83**, 109
Cytochalasin D
effect on fertilization events in mouse egg: MARO, JOHNSON, PICKERING & FLACH **81**, 211
effect on cytocplasmic actin distribution in mouse blastomeres: JOHNSON & MARO **82**, 97
Cytogel
as a model for crawling of cells: OSTER **83 Supplement**, 329
models of *Physarum* shuttle streaming: ODELL **83 Supplement**, 261
Cytokeratins
as regional biosynthetic markers in early amphibian embryo: SLACK **80**, 289
in *Xenopus* oocytes: GODSAVE, WYLIE, LANE & ANDERTON **83**, 157
Cytoplasmic clock
controlling autonomous cortical activity in mouse eggs: WAKSMUNDZKA, KRYSIAK, KARASIEWICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
Cytoskeleton
role in control of intravitelline mitoses in *Drosophila* embryos: TOGASHI & OKADA **80**, 43

Deoxyribose nucleic acid (DNA)
methylation *versus* gene expression: BIRD **83 Supplement**, 31
replication in mouse embryos: BOLTON, OADES & JOHNSON **79**, 139
Dermal papilla
cell aggregative behaviour *in vivo* and *in vitro*: JAHODA & OLIVER **79**, 211
effects of wounding on hair growth in the rat: JAHODA & OLIVER **83**, 81
JAHODA & OLIVER **83**, 95
Descending contralateral movement detector (DCMD)
in reduced-eye mutants of *Melanoplus*: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Determination
mechanism in early development of axolotl embryos: SLACK **80**, 289
Diffusion model
for butterfly wing patterns: BARD & FRENCH **84**, 255
Digestive tract
differentiation *in vitro* of chick stomach endoderm: ISHIZUYA-OKA & MIZUNO **82**, 163
Drosophila melanogaster
analysis of transcriptional regulation of *s38* chorion gene: KALFAYAN, WAKIMOTO & SPRADLING **83 Supplement**, 137
differential gene amplification in polytene tissues: BOSTOCK **83 Supplement**, 7
egg
arrest of intravitelline mitoses by u.v. irradiation of surface: TOGASHI & OKADA **80**, 43
heat shock – a comparison with yeast: LINDQUIST **83 Supplement**, 147
larval
adult pattern blueprint in epidermal cells: MADHAVAN & MADHAVAN **82**, 1
models for segmentation: MEINHARDT **83 Supplement**, 289
ovary
differentiation markers: WHITE, PERRIMON & GEHRING **84**, 275
Duck
embryo
interdigital membranes during morphogenesis of webbed feet: HURLE & FERNANDEZ-TERAN **79**, 201
Dugesia tigrina
pattern of mitosis in anterior and posterior regeneration: SALÓ & BAGUÑÀ **83**, 63
Ectoderm
isolated from axolotl gastrulae – *in vitro* development: SLACK **80**, 321
Egg
mouse
autonomous cortical activity controlled by cytoplasmic clock: WAKSMUNDZKA, KRYSIAK, KARASIEWICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
changes in actin distribution during fertilization: MARO, JOHNSON, PICKERING & FLACH **81**, 211
EK cells
effect on parthenogenetic development in mouse embryos: KAUFMAN, EVANS, ROBERTSON & BRADLEY **80**, 75
Electrical control
of abscission and plant development: TREWAVAS, SEXTON & KELLY **83 Supplement**, 179
Electron microscope
evidence for asialoglycoprotein receptors on rat hepatocytes: CONTI DEVIRGILIIS, DINI & RUSSO-CAIA **79**, 41
Embryoid body
mode of cell death associated with cavitation: BOYD, HOOPER & WYLLIE **80**, 63
Embryonal carcinoma
cells aggregated with preimplantation mouse embryos: LEHTONEN, WARTIOVAARA & REIMA **81**, 17
Embryos
Xenopus laevis
intermediate filaments react with antimammalian vimentin antibodies: GODSAVE, ANDERTON, HEASMAN & WYLIE **83**, 169
Endocrine cells
distribution of progenitor cells in chick gut: RAWDON, KRAMER & ANDREW **82**, 131
Endoderm
expression of apolipoprotein in mouse yolk sac: SHI & HEATH **81**, 143
role in blood cell ontogeny in *Pleurodeles waltl*: DEPARIS & JAYLET **81**, 37
use in chimaeras between embryo cells and embryonal carcinoma cells: LEHTONEN, WARTIOVAARA & REIMA **81**, 17
Epiboly
effect of microtubule inhibitors in chick blastoderm: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273
Epidermal cells
blueprint for adult pattern in larval cells: MADHAVAN & MADHAVAN **82**, 1

Epidermis
development from isolated ectoderm of axolotl gastrulae: SLACK **80**, 321
Epimucin
as regional biosynthetic markers in early amphibian embryo: SLACK **80**, 289
Epithelial induction
of osteogenesis in embryonic chick mandibular mesenchyme: VAN EXAN & HALL **79**, 225
Epithelial–mesenchymal interaction
between allantoic endoderm and presumptive digestive area tissues: YASUGI **80**, 137
Epithelio-mesenchymal interface
in embryonic chick leg buds: FERNANDEZ-TERAN & HURLE **84**, 159
in interdigital membranes of webbed feet of duck embryo: HURLE & FERNANDEZ-TERAN **79**, 201
Erythroid cells
of chick embryos – haemoglobin and globin synthesis: SCHALEKAMP & VAN GOOR **84**, 125
Eutherians
chromosomes and sex differentiation: MÜLLER **83 Supplement**, 41
Exocoelomic fluid
from cultures of rat conceptuses – a measure of yolk sac activity: HUXHAM & BECK **84**, 203
External cells
heterogeneous differentiation in isolated mouse ICMs in culture: NICHOLS & GARDNER **80**, 225
Extraembryonic cells
cavitation of aggregates from gastrulating chick embryos: MILOS, ZALIK, SANDERS & LEDSHAM **83**, 43
Extraembryonic ectoderm
differentiation in isolated early mouse ICMs in culture: NICHOLS & GARDNER **80**, 225
Extraembryonic endoderm
in mouse – an *in situ* cell marker for clonal analysis of development: GARDNER **80**, 251
Eye
development of iris in chick embryo – immunocytochemical study: FERRARI & KOCH **81**, 153
differentiation of chick irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
Facial mesenchyme
cell cycle analysis in chick embryo: MINKOFF **81**, 49
MINKOFF & MARTIN **81**, 61
Feather
development in chick skin: DAVIDSON **84**, 149
formation
effect of exogenous glycosaminoglycans on skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **83**, 25
Feather germs
spatially periodic patterns created by mechanical instability: HARRIS, STOPAK & WARNER **80**, 1
Ferret
mapping of cortical histogenesis: McSHERRY **81**, 239
Fertilization
of mouse egg – changes in actin distribution: MARO, JOHNSON, PICKERING & FLACH **81**, 211
Fibre order
in normal *Xenopus* optic tract near the chiasma: FAWCETT, TAYLOR, GAZE, GRANT & HIRST **83**, 1
Fibroblast traction
in feather germ pattern formation in chick embryos: HARRIS, STOPAK & WARNER **80**, 1
Fibroblasts
of rat skin cultured *in vivo* and *in vitro*: JAHODA & OLIVER **79**, 211
Fibronectin
associated with cell surface in chick embryo cranium: MEIER & DRAKE **80**, 175
Field shape
and pattern formation in axolotl blastema: HOLDER & REYNOLDS **79**, 165
Filaments
containing cytokeratin in *Xenopus* oocytes: GODSAVE, WYLIE, LANE & ANDERTON **83**, 157
Flagellar regeneration
in *Chlamydomonas* – induction of gene expression: SCHLOSS **83 Supplement**, 89
Flank ectoderm
response to ridge induction in chick embryo: CARRINGTON & FALLON **84**, 19
Forelimb
regeneration in *Xenopus* after radius–ulna removal: KORNELUK & LIVERSAGE **82**, 9

Frog
Limnodynastes dorsalis
patterns of cell division during visual streak formation: COLEMAN, DUNLOP & BEAZLEY **83**, 119

Gap junctions
in preimplantation stages of mouse embryo: GOODALL & JOHNSON **79**, 53
Gastrointestinal tract
distribution of endocrine cell progenitors in chick: RAWDON, KRAMER & ANDREW **82**, 131
Gastrula
chick
control of somite segmentation: BELLAIRS & VEINI **79**, 183
Gastrulation
of chick embryo – labelling of basement membrane: SANDERS **79**, 113
of chick embryos: MILOS, ZALIK, SANDERS & LEDSHAM **83**, 43
Gene
control in cereal aleurone cells: BAULCOMBE, LAZARUS & MARTIENSSEN **83 Supplement**, 119
expression
cleavage and DNA replication in mouse embryos: BOLTON, OADES & JOHNSON **79**, 139
versus DNA methylation: BIRD **83 Supplement**, 31
localization
in *Xenopus laevis*: THIÉBAUD, COLOMBELLI & MÜLLER **83**, 33
Genes
involved in control of development in mouse embryo: JOHNSON, MCONNEL & VAN BLERKOM **83 Supplement**, 197
Germ cell
a cell-surface differentiation antigen of mouse spermatogenesis: BECHTOL **81**, 93
role of glycoconjugates in migration in anuran amphibia: DELBOS, GIPOULOUX & SAIDI **82**, 119
Germline transformation
in *Drosophila*: KALFAYAN, WAKIMOTO & SPRADLING **83 Supplement**, 137
Gibberellins
and gene control in cereal aleurone cells: BAULCOMBE, LAZARUS & MARTIENSSEN **83 Supplement**, 119
Globin
and haemoglobin synthesis in isolated chick embryo erythroid cells: SCHALEKAMP & VON GOOR **84**, 125
Glycolipids
in early amphibian embryos: SLACK **80**, 289
Glycoproteins
as regional biosynthetic markers in early amphibian embryo: SLACK **80**, 289
Glycosaminoglycans
effect on avian skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **82**, 25
Gonadal proteins
in developing eutherians: MÜLLER **83 Supplement**, 41
Granulocyte progenitor cell (GM-CFC)
ontogeny in the beagle dog: NOTHDURFT, BRAASCH, CALVO, PRÜMMER, CARBONELL, GRILLI & FLIEDNER **80**, 87
Grasshopper
reduced-eye mutant characteristics: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Gravity
role in pattern formation in inverted *Xenopus* eggs: NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
Growth factors
involved in differentiation of mouse embryonic kidney: THESLEFF & EKBLOM **82**, 147
Gynogenesis
diploid – in *Xenopus laevis*: THIÉBAUD, COLOMBELLI & MÜLLER **83**, 33

Haemoglobin
and globin synthesis in isolated chick embryo erythroid cells: SCHALEKAMP & VAN GOOR **84**, 125
Haemopoiesis
in erythroid cells of chick embryos: SCHALEKAMP & VAN GOOR **84**, 125
Haemopoietic progenitor cells (GM-CFC)
ontogeny in the beagle dog: NOTHDURFT, BRAASCH, CALVO, PRÜMMER, CARBONELL, GRILLI & FLIEDNER **80**, 87
Hair growth
after wounding of vibrissa follicles in the rat: JAHODA & OLIVER **83**, 81
JAHODA & OLIVER **83**, 95
Heart development
in *Ambystoma mexicanum*: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
Heat shock
comparison of *Drosophila* and yeast: LINDQUIST **83 Supplement**, 147

Hensen's node
role in somite formation in avian embryo: STERN & BELLAIRS **81**, 75
Hepatocytes
differentiation into intrahepatic bile duct cells: SHIOJIRI **79**, 25
isolated from foetal rats–asialoglycoprotein receptors: CONTI DEVIRGILIIS, DINI & RUSSO-CAIA **79**, 41
Histoblasts
role in *Drosophila* adult cuticular pattern formation: MADHAVAN & MADHAVAN **82**, 1
Histogenesis
in cortex of ferret: McSHERRY **81**, 239
Histogenetic capacity
of caudal end of embryonic axis of the mouse: TAM **82**, 253
Histology
effects of wounding vibrissa follicles in rats: JAHODA & OLIVER **83**, 81
Hormones
distribution of endocrine cell progenitors in gut of chick embryos: RAWDON, KRAMER & ANDREW **82**, 131
Hydra
analysis of chimaeras from normal and slow-budding strains: TAKANO & SUGIYAMA **80**, 155
Hydractinia echinata
retinoids and pattern formation in a hydroid: MÜLLER **81**, 253
Hypoblast
effect of microtubule inhibitors on expansion in chick blastoderm: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273

Identified neuron
in leech nervous system:KUWADA **79**, 125
IgG
in cultures of rat conceptuses: HUXHAM & BECK **84**, 203
Imaginal disc
in *Drosophila* segmentation : MEINHARDT **83 Supplement**, 289
Immunocytochemistry
differentiation of chick irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
study of development of iris in chick embryo: FERRARI & KOCH **81**, 153
Immunoglobulin
genes – rearrangements not involving gain or loss of DNA: BOSTOCK **83 Supplement**, 7
Immunohistochemistry
apolipoprotein expression by murine visceral yolk sac endoderm: SHI & HEATH **81**, 143
Immunolatex microspheres
used to locate fibronectin in chick embryo cranium: MEIER & DRAKE **80**, 175
Implantation
of thymus and antibody responses: GEARING, CRIBBIN & HORTON **84**, 287
Induction
of intestinal cytodifferentiation by chick duodenal mesenchyme: ISHIZUYA-OKA & MIZUNO **82**, 163
Inner cell masses (ICM)
isolated from mouse blastocysts: NICHOLS & GARDNER **80**, 225
trophectodermal processes regulate totipotency expression in mouse: FLEMING, WARREN, CHISHOLM & JOHNSON **84**, 63
Innervation
of mystacial vibrissae in mouse embryo: WRENN & WESSELLS **83**, 137
of proximally rotated chick embryo wings: LAING **83**, 213
Insect
butterfly wing patterns: BARD & FRENCH **84**, 255
cricket
structure of supernumerary leg regenerates: FRENCH **81**, 185
Intercalary regeneration
models for positional signalling: MEINHARDT **83 Supplement**, 289
Interdigital membrane
during morphogenesis of digits of duck embryo webbed foot: HURLE & FERNANDEZ-TERAN **79**, 201
Intermediate filaments
in *Xenopus* oocytes:GODSAVE, WYLIE, LANE & ANDERTON **83**, 157
Intrahepatic bile ducts
origin of in mouse embryos: SHIOJIRI **79**, 25
Inverted eggs
of *Xenopus* – **cytoplasmic rearrangements after fertilization:** NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
In vitro
culture of rat visceral yolk sac: LU, SOBIS, VAN HOVE & VANDEPUTTE **80**, 127
culture of mouse embryonic kidney: THESLEFF & EKBLOM **82**, 147
development of *Xenopus laevis* – antibody responses: LALLONE, CHAMBERS & HORTON **84**, 191

differentiation of rat testis: AGELOPOULOU, MAGRE, PATSAVOUDI & JOST **83**, 15
Iris
differentiation of chick irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
immunocytochemical study of muscle differentiation in chick embryo: FERRARI & KOCH **81**, 153
Irradiation
of *Drosophila larvae* - effect on adult pattern formation: MADHAVAN & MADHAVAN **82**, 1

Keratinization
effect of exogenous glycosaminoglycans on skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **82**, 25
Kidney
role of transferrin in differentiation of mouse embryonic kidney: THESLEFF & EKBLOM **82**, 147
Kinetics
of cell replication in embryonic chick lens: ZWAAN & KENYON **84**, 331

Lambda
bacteriophage – a programme for its construction: BRAMMAR & HADFIELD **83 Supplement**, 75
Lamellipodia
models using cytogels: OSTER **83 Supplement**, 329
Lectins
role in migration of anuran amphibian germ cells: DELBOS, GIPOULOUX & SAIDI **82**, 119
Leech
motor neuron
normal and abnormal development: KUWADA **79**, 125
Leg
cricket
regeneration in cricket: FRENCH **81**, 185
Lens
fibre formation in embryonic chicks: ZWAAN & KENYON **84**, 331
Lepidoptera
colour pattern modification by coldshock: NIJHOUT **81**, 287
Limb blastema
of axolotl – relationship between pattern and form: HOLDER & REYNOLDS **79**, 165
Limb bud
cell movements in presence and absence of apical ectodermal ridge: GUMPEL-PINOT, EDE & FLINT **80**, 105
Limb development
in chick embryo: CARRINGTON & FALLON **84**, 19
of chick – apical ectodermal ridge in wing bud: TODT & FALLON **80**, 21
of duck embryo: HURLE & FERNANDEZ-TERAN **79**, 201
syndactyly induced by Janus Green B in chick: FERNANDEZ-TERAN & HURLE **84**, 159
Limb regeneration
in axolotl – cellular contributions to supernumeraries: MADEN & MUSTAFA **84**, 233
pattern formation in dorsal–ventral axis in axolotl: HOLDER & WEEKES **82**, 217
Limnodynastes dorsalis
patterns of cell division during visual streak formation: COLEMAN, DUNLOP & BEAZLEY **83**, 119
Liver
embryonic mouse
origin of intrahepatic bile duct cells: SHIOJIRI **79**, 25
Lysogenic pathways
in infective pathways of bacteriophage lambda: BRAMMAR & HADFIELD **83 Supplement**, 75

Malic enzyme
as cell marker for clonal analysis of development in mouse: GARDNER **80**, 251
Mammalian cells
gene amplification: BOSTOCK **83 Supplement**, 7
Mammals
mapping of cortical histogenesis in the ferret: McSHERRY **81**, 239
ontogeny of haemopoietic progenitor cells (GM-CFC) in the dog: NOTHDURFT, BRAASCH, CALVO, PRÜMMER, CARBONELL, GRILLI & FLIEDNER **80**, 87
Mandibular mesenchyme
epithelial induction of osteogenesis in chick embryos: VAN EXAN & HALL **79**, 225
Mapping
of cortical histogenesis in the ferret: McSHERRY **81**, 239
Markers
of differentiation markers in *Drosophila*: WHITE, PERRIMON & GEHRING **84**, 275

Mating-type locus
of yeast – rearrangements not involving gain or loss of DNA: BOSTOCK **83 Supplement**, 7
Mechanical instability
model for generation of spatially periodic patterns: HARRIS, STOPAK & WARNER **80**, 1
Melanocyte
differentiation *in vitro* culture of mouse embryo: ITO & TAKEUCHI **84**, 49
Melanoid mutant
of axolotl – analysis of pigmentary system: FROST, EPP & ROBINSON **81**, 127
Melanoplus sanguinipes
reduced-eye mutant characteristics: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Mesenchyme
cell cycle analysis in chick embryo: MINKOFF **81**, 49
MINKOFF & MARTIN **81**, 61
induction of chick intestinal tract *in vitro*: ISHIZUYA-OKA & MIZUNO **82**, 163
chick embryonic
epithelial induction of osteogenesis: VAN EXAN & HALL **79**, 225
Mesoderm
formation of somites in avian embryos: STERN & BELLAIRS **81**, 75
Messenger RNA
injected into mouse oocytes and ova: EBERT, PAYNTON, MCKNIGHT & BRINSTER **84**, 91
Metamerism
in localization of fibronection during development of chick cranium: MEIER & DRAKE **80**, 175
5-methycytosine
repression of gene expression: BIRD **83 Supplement**, 31
Methylation
of DNA *versus* gene expression: BIRD **83 Supplement**, 31
MHC
-compatible and -incompatible thymus implants into *Xenopus*: GEARING, CRIBBIN & HORTON **84**, 287
Microtubules
effect of inhibitors on expansion of hypoblast of chick blastoderms: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273
influence compaction in preimplantation mouse embryos: MARO & PICKERING **84**, 217
Midbody
presence in preimplantation mouse embryo, role in communication: GOODALL & JOHNSON **79**, 53
Migration
of anuran amphibian germ cells – role of glycoconjugates: DELBOS, GIPOULOUX & SAIDI **82**, 119
of chick hypoblast cells – role of microtubule complex: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273
Mitosis
patterns in anterior and posterior regeneration in planarians: SALÓ & BAGUÑÀ **83**, 63
Mitotic cycle
in *Drosophila* embryos after u.v. irradiation of egg surface: TOGASHI & OKADA **80**, 43
Modelling
of cell division using a topological approach: RANSOM & MATELA **83 Supplement**, 233
Mollusc
pigmentation patterns: MEINHARDT **83 Supplement**, 289
Monoclonal antibodies
used in study of heart development in *Ambystoma*: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
used to provide differentiation markers in *Drosophila* ovary: WHITE, PERIMMON & GEHRING **84**, 275
used to study cell-surface differentiation antigen of spermatogenesis: BECHTOL **81**, 93
Morphogens
determining pigmentation patterns in butterfly wings: BARD & FRENCH **84**, 255
Morula
mouse
intercellular couplings: GOODALL & JOHNSON **79**, 53
Mosaics
X-inactivation in mouse – variability: WEST, BUCHER, LINKE & DUNNWALD **84**, 309
Motility
in a cell monolayer in culture: HONDA *et al.* **83 Supplement**, 313
of cells – models using cytogels: OSTER **83 Supplement**, 329
Motoneurons
of proximally rotated chick embryo wings: LAING **83**, 213

Motor neuron
in leech nervous system: KUWADA **79**, 125
Mouse
blastocysts
culture of isolated inner cell masses: NICHOLS & GARDNER **80**, 225
trophectodermal processes regulate ICM totipotency expression: FLEMING, WARREN, CHISHOLM & JOHNSON **84**, 63
blastomere
distribution of cytoplasmic actin: JOHNSON & MARO **82**, 97
chimaeras
investigation of variability: WEST, BÜCHER, LINKE & DÜNNWALD **84**, 309
egg
autonomous cortical activity controlled by cytoplasmic clock: WAKSMUNDZKA, KRYSIAK, KARASIE-WICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
changes in actin distribution during fertilization: MARO, JOHNSON, PICKERING & FLACH **81**, 211
embryo
a cell-surface differentiation antigen of spermatogenesis: BECHTOL **81**, 93
aggregation with teratocarcinoma-derived cells: LEHTONEN, WARTIOVAARA & REIMA **81**, 17
apolipoprotein expression by yolk sac endoderm: SHI & HEATH **81**, 143
cleavage, DNA replication and gene expression: BOLTON, OADES & JOHNSON **79**, 139
differentiation *in vitro* of neural crest cells: ITO & TAKEUCHI **84**, 49
early development of mystacial vibrissae: WRENN & WESSELLS **83**, 137
effect of injected pluripotential cells on parthenogenetic development: KAUFMAN, EVANS, ROBERTSON & BRADLEY **80**, 75
histogenetic capacity of caudal end of embryonic axis: TAM **82**, 253
in situ marker for clonal analysis of extraembryonic endoderm: GARDNER **80**, 251
intercellular couplings in preimplantation stages: GOODALL & JOHNSON **79**, 53
microtubules influence compaction: MARO & PICKERING **84**, 217
origin of intrahepatic bile duct cells: SHIOJIRI **79**, 25
pattern of alkaline phosphatase activity in developing spinal cord: KWONG & TAM **82**, 241
programmed development: JOHNSON, MCCONNEL & VAN BLERKOM **83 Supplement**, 197
role of transferrin in differentiation of kidney: THESLEFF & EKBLOM **82**, 147
oocyte
translation and stability of injected mRNA: EBERT, PAYNTON, MCKNIGHT & BRINSTER **84**, 91
muscle
differentiation in chick embryo iris development: FERRARI & KOCH **81**, 153
differentiation of chick irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
spindles – development in cat embryos: MILBURN **82**, 177
Muscle development
in *Ambystoma mexicanum*: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
Mutant
melanoid
of axolotl – analysis of pigmentary system: FROST, EPP & ROBINSON **81**, 127
periodic albinism (a^P) in *Xenopus laevis* – localization of the gene: THIÉBAUD, COLOMBELLI & MÜLLER **83**, 33
reduced-eye in *Melanoplus sanguinipes*: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Mutations
intracellular
affecting patterning of oral structures in *Tetrahymena*: FRANKEL *et al.* **82**, 41
FRANKEL *et al.* **82**,67
Myogenic cells
movement in developing avian limb bud: GUMPEL-PINOT, EDE & FLINT **80**, 105

Necrosis
associated with cavitation in teratocracinoma-derived embryoid bodies: BOYD, HOOPER & WYLLIE **80**, 63
in chick optic cup development: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241
Nematode
switch genes and sex determination: HODGKIN **83 Supplement**, 103
Nerves
role in regeneration of axolotl arms after delayed amputation: WALLACE **84**, 303

Nervous system
normal and abnormal development of an identified leech neurons: KUWADA **79**, 125
Neural crest
differentiation *in vitro* of cells from mouse embryo: ITO & TAKEUCHI **84**, 49
Neuron
identified in leech nervous system: KUWADA **79**, 125
Nocodazole
effect on compaction in preimplantation mouse embryos: MARO & PICKERING **84**, 217
effect on expansion of hypoblast and epiboly in chick blastoderm: MAREEL, BELLAIRS, DE BRUYNE & VAN PETEGHEM **81**, 273
Nuclear architecture
implications for development: HESLOP-HARRISON & BENNETT **83 Supplement**, 51

Ocelli
in reduced-eye mutant of the grasshopper: EMERY, BELL, CHAPCO & STEEVES **83**, 189
Oocyte
mouse
translation and stability of injected mRNA: EBERT, PAYNTON, MCKNIGHT & BRINSTER **84**, 91
Xenopus laevis
cytokeratin-containing filaments: GODSAVE, WYLIE, LANE & ANDERTON **83**, 157
intermediate filaments react with anti-mammalian vimentin antibodies: GODSAVE, ANDERTON, HEASMAN & WYLIE **83**, 169
Ooogenesis
differentiation markers in *Drosophila*: WHITE, PERRIMON & GEHRING **84**, 275
Optic cup
evidence for new necrotic area in chick embryo: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241
Optic tract
fibre order in normal *Xenopus* near the chiasma: FAWCETT, TAYLOR, GAZE, GRANT & HIRST **83**, 1
Oral apparatus
of *Tetrahymena* – mutational analysis of patterning: FRANKEL *et al.* **82**, 41
FRANKEL *et al.* **82**, 67
Order
of chromosomes – implications for development: HESLOP-HARRISON & BENNETT **83 Supplement**, 51
Organ culture
differentiation of chick irideal muscles *in vitro*: FERRARI & KOCH **81**, 169
of chick stomach endoderm in presence of duodenal mesenchyme: ISHIZUYA-OKA & MIZUNO **82**, 163
of rat visceral yolk sac: LU, SOBIS, VAN HOVE & VANDEPUTTE **80**, 127
Organogenesis
in mouse embryonic kidney: THESLEFF & EKBLOM **82**, 147
in rat conceptuses cultured in rat and human sera: HUXHAM & BECK **84**, 203
Osteogenesis
in embryonic chick mandibular mesenchyme: VAN EXAN & HALL **79**, 225
Ova
mouse
translation and stability of injected mRNA: EBERT, PAYNTON, MCKNIGHT & BRINSTER **84**, 91

Pancreas
distribution of endocrine cell progenitors in gut of chick embryos: RAWDON, KRAMER & ANDREW **82**, 131
Papilla cells
aggregative behaviour *in vivo* and *in vitro* culture: JAHODA & OLIVER **79**, 211
Parthenogenetic embryos
influence of injected pluripotential (EK) cells: KAUFMAN, EVANS, ROBERTSON & BRADLEY **80**, 75
Parthenogenetic activity
in mouse egg cortex: WAKSMUNDZKA, KRYSIAK, KARASIEWICZ, CZOŁOWSKA & TARKOWSKI **79**, 77
Pattern formation
after fertilization of inverted *Xenopus* eggs: NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
and regeneration in planarians: SALÓ & BAGUÑÁ **83**, 63
during regeneration of mixed-handed axolotl forelimb: HOLDER & WEEKES **82**, 217
during ridge induction in flank ectoderm of chick embryo: CARRINGTON & FALLON **84**, 19
effect of retinoids in a hydroid: MÜLLER **81**, 253

in axolotl limb blastema: HOLDER & REYNOLDS **79**, 165
in axolotl skin gland spacing: HOLDER & GLADE **79**, 97
in butterfly wing pigmentation: BARD & FRENCH **84**, 255
in chick segmental plate: CHENEY & LASH **79**, 1
in *Drosophila* – do larval cells possess blueprint for adult?: MADHAVAN & MADHAVAN **82**, 1
in early development of mystacial vibrissae in the mouse: WRENN & WESSELS **83**, 137
in feather germs in chick embryos – mechanical instability model: HARRIS, STOPAK & WARNER **80**, 1
in formation of somites in avian embryo: STERN & BELLAIRS **81**, 75
in oral structures in *Tetrahymena*: FRANKEL *et al.* **82**, 41
FRANKEL *et al.* **82**, 67
in supernumerary limbs of axolotl: MADEN & MUSTAFA **84**, 233
models for *Drosophila* segmentation and mollusc pigmentation: MEINHARDT **83 Supplement**, 289
modification of colour pattern by coldshock in Lepidoptera: NIJHOUT **81**, 287

Periodic albinism
localization of gene in *Xenopus laevis*: THIÉBAUD, COLOMBELLI & MÜLLER **83**, 33

Phenocopy
colour pattern modification by coldshock in Lepidoptera: NIJHOUT **81**, 287

Phosphoglycerate kinase (PGK-1)
in mouse aggregation chimaeras and X-inactivation mosaics: WEST, BÜCHER, LINKE & DÜNNWALD **84** 309

Photoregulation
of biosynthesis of ribulose bisphosphate carboxylase: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163

Physarum polycephalum
shuttle streaming – modelled with mathematically generated cytogel: ODELL **83 Supplement**, 261

Pigmentation patterns
of molluscs: MEINHARD **83 Supplement**, 289

Pigment cells
in developing wild-type axolotls: FROST, EPP & ROBINSON **81**, 105
of melanoid phenotype axolotls: FROST, EPP & ROBINSON **81**, 127

Planarian
pattern of mitosis in anterior and posterior regeneration: SALÓ & BAGUÑÁ **83**, 63

Plasticity
in development of plants: TREWAVAS, SEXTON & KELLY **83 Supplement**, 179

Pleurodeles waltl
blood cell ontogeny
role of cell endoderm cells: DEPARIS & JAYLET **81**, 37

Pluripotential cells (EK)
effect on parthenogenetic development in mouse embryos: KAUFMAN, EVANS, ROBERTSON & BRADLEY **80**, 75

Polarity
calcium and abscission in plants: TREWAVAS, SEXTON & KELLY **83 Supplement**, 179

Polarization
in mouse blastomeres – role of actin: JOHNSON & MARO **82**, 97

Polyadenylation
and transcription in early quail embryo: OLSZAŃSKA, KLUDKIEWICZ & LASSOTA **79**, 11

Polygonal sheet
cell behaviour in cell cultures: HONDA *et al.* **83 Supplement**, 313

Polypeptides
in sex differentiation of eutherians: MÜLLER **83 Supplement**, 41

Positional information
in segmentation and pigmentation patterns of molluscs: MEINHARDT **83 Supplement**, 289

Precis coenia
colour pattern modification by coldshock: NIJHOUT **81**, 287

Preprogramming
in control of somite segmentation in chick gastrula: BELLAIRS & VEINI **79**, 183

Primitive streak
formation of somites in avian embryos: STERN & BELLAIRS **81**, 75
of mouse – histogenetic capacity of tissues: TAM **82**, 253

Programmes
for development in mouse embryo: JOHNSON, MCCONNEL & VAN BLERKOM **83 Supplement**. 197

Propagating waves
role in pattern formation in *Drosophila* and molluscs: MEINHARDT **83 Supplement**, 289

Protein
transport
in cultures of rat embryos: HUXHAM & BECK **84**, 203
Protozoa
mutational analysis of patterning of *Tetrahymena* oral structures: FRANKEL *et al.* **82**, 41
FRANKEL *et al.* **82**, 67
Pteridines
in developing wild-type axolotls: FROST, EPP & ROBINSON **81**, 105
of melanoid phenotype axolotls: FROST, EPP & ROBINSON **81**, 127

Quail
allantoic endoderm
implanted into presumptive digestive area in chick: YASUGI **80**, 137
embryo
transcription and polyadenylation processes: OLSZAŃSKA, KLUDKIEWICZ & LASSOTA **79**, 11

Radius
removal in *Xenopus* – effect on regeneration: KORNELUK & LIVERSAGE **82**, 9
Rana dalmatina
role of glycoconjugates in migration of germ cells: DELBOS, GIPOULOUX & SAIDI **82**, 119
Rat
dermal papillae
aggregative behaviour *in vivo* and *in vitro*: JAHODA & OLIVER **79**,211
embryo
exocoelmomic fluid protein from cultured conceptuses: HUXHAM & BECK **84**, 203
scanning electron microscopy of wound healing: SMEDLEY & STANISSTREET **83**, 109
foetus and adult
asialoglycoprotein receptors on isolated hepatocytes: CONTI DEVIRGILIIS, DINI & RUSSO-CAIA **79**, 41
hair growth characteristics following wounding of follicles: JAHODA & OLIVER **83**, 81
histology of hair growth following wounding of follicles: JAHODA & OLIVER **83**, 95
testis
initial phases of differentiation *in vitro*: AGELOPOULOU, MAGRE, PATSAVOUDI & JOST **83**, 15
visceral yolk sac
differentiation potentiality in organ culture: LU, SOBIS, VAN HOVE & VANDEPUTTE **80**, 127
Reconstruction
of serial electron micrographs of chromosomes: HESLOP-HARRISON & BENNETT **83 Supplement**, 51
Regeneration
and pattern formation in planarians: SALÓ & BAGUÑÀ **83**, 63
forelimb
effects of radius–ulna removal in *Xenopus* froglets: KORNELUK & LIVERSAGE **82**, 9
in a hydroid – effect of retinoids on pattern formation: MÜLLER **81**, 253
of axolotl arms after delayed amputation: WALLACE **84**, 303
of supernumerary legs in the cricket: FRENCH **81**, 185
of surgically created mixed-handed axolotl forelimbs: HOLDER & WEEKES **82**, 217
Regression
of Hensen's node – role in formation of somites in avian embryo: STERN & BELLAIRS **81**, 75
Regulation mechanism
for intravitelline mitoses in *Drosophila* embryos: TOGASHI & OKADA **80**, 43
Replication
of DNA in mouse embryos: BOLTON, OADES & JOHNSON **79**, 139
Retina
development in the frog *Limnodynastes*: COLEMAN, DUNLOP & BEAZLEY **83**, 119
evidence for new necrotic area in chick optic cup: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241
Retinoic acid
upper beak defects in chick embryos: TAMARIN, CRAWLEY, LEE & TICKLE **84**, 105
Retinoids
and pattern formation in a hydroid: MÜLLER **81**, 253
Retinotopy
in *Xenopus*: FAWCETT, TAYLOR, GAZE, GRANT & HIRST **83**, 1
Reversal
of chick embryonic lens affects cell replication & differentiation: ZWAAN & KENYON **84**, 331
Ribonucleic acid (RNA)
abundance in *Chlamydomonas* gene

expression induced by flagellar regeneration: SCHLOSS **83 Supplement**, 89
during early development of quail embryo – mRNA and tRNA: OLSZAŃSKA, KLUDKIEWICZ & LASSOTA **79**, 11
messenger
effects of gibberellins in cereal aleurone cells: BAULCOMBE, LAZARUS & MARTIENSSEN **83 Supplement**, 119
increase during chloroplast development in higher plants: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163
injected into mouse oocytes and ova: EBERT, PAYNTON, MCKNIGHT & BRINSTER **84**, 91

Ribulose bisphosphate carboxylase
role in photoregulation in higher plants: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163

Rotation
of chick embryos wing buds: LAING **83**, 213

Rubisco gene
expression during greening of *Pisum* seedlings: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163

Scanning electron microscopy (SEM)
of activation wave in egg of *Xenopus laevis*: TAKEICHI & KUBOTA **81**, 1
of somitomeric organization in snapping turtle embryos: PACKARD & MEIER **84**, 35
of wound healing in rat embryos: SMEDLEY & STANISSTREET **83**, 109
study of development of iris in chick embryo: FERRARI & KOCH **81**, 153

Segmentation
control in gastrula stages of the chick embryo: BELLAIRS & VEINI **79**, 183

Segmental plate
of chick – increase in cell–cell adhesion results in meristic pattern: CHENEY & LASH **79**, 1
somitomeric organization in snapping turtle embryos: PACKARD & MEIER **84**, 35

Sertoli cells
differentiation of rat testis: AGELOPOULOU, MAGRE, PATSAVOUDI & JOST **83**, 15

Sex determination
and switch genes in nematodes: HODGKIN **83 Supplement**, 41

Shuttle streaming
in *Physarum* – modelled using cytogel properties: ODELL **83 Supplement**, 261

Skin
avian
effect of exogenous glycosaminoglycans on skin differentiation: BECCHETTI, STABELLINI, CARUSO & CARINCI **82**, 25
development of feather primordia in chick: DAVIDSON **84**, 149

Skin glands
in axolotl – formation of spacing pattern: HOLDER & GLADE **79**, 97

Somite
differentiation of connective tissue in chick: SWALLA & SOLURSH **79**, 243
segmentation
in chick gastrula: BELLAIRS & VEINI **79**, 183
in avian embryos – role of node regression and elongation: STERN & BELLAIRS **81**,75

Somitogenesis
in chick embryo segmental plate: CHENEY & LASH **79**, 1

Somitomere
organization in segmental plate in turtle embryos: PACKARD & MEIER **84**, 35

Spacing pattern
in axolotl skin glands: HOLDER & GLADE **79**, 97

Spermatogenesis
in mouse – a cell-surface differentiation antigen: BECHTOL **81**, 93

Spinal cord
of mouse – pattern of alkaline phosphatase activity: KWONG & TAM **82**, 241

Spindles
development in cat muscles: MILBURN **82**, 177

Starfish
allocation of mesendodermal cells during early embryogenesis: KOMINAMI **84**, 177

Stem cells
development in blood of *Pleurodeles waltl*: DEPARIS & JAYLET **81**, 37

Striated border
induced *in vitro* in chick stomach endoderm by duodenal mesenchyme: ISHIZUYA-OKA & MIZUNO **82**, 163

Sucrase
induced *in vitro* in chick stomach endoderm by duodenalmesenchyme: ISHIZUYA-OKA & MIZUNO **82**, 163

Supernumerary leg
structure in the cricket: FRENCH **81**, 185
Switch
evidence for non-clonal mechanism at the embryonic haemoglobin switch: SCHALEKAMP & VAN GOOR **84**, 125
Switch genes
and sex determination in nematodes: HODGKIN **83 Supplement**, 103
Symmetrization
of inverted *Xenopus* eggs: NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
Syndactyly
induced by Janus Green B in embryonic chick leg bud: FERNANDEZ-TERAN & HURLE **84**, 159

Tail bud
of mouse – histogenetic capacity of tissues: TAM **82**, 253
Taxol
effect on compaction in preimplantation mouse embryos: MARO & PICKERING **84**, 217
Teratocarcinoma
-derived embryoid bodies – mode of cell death during cavitation: BOYD, HOOPER & WYLLIE **80**, 63
Terminal differentiation
in chick embryonic lens: ZWAAN & KENYON **84**, 331
Testis
differentiation in rat embryos *in vitro*: AGELOPOULOU, MAGRE, PATSAVOUDI & JOST **83**, 15
Tetrahymena thermophila
mutational analysis of patterning of oral structures: FRANKEL *et al* **82**, 41
FRANKEL *et al.* **82**, 67
Thymus
implantation and antibody responses in *Xenopus*: GEARING, CRIBBIN & HORTON **84**, 287
Tissue interaction
during development of feather primordia in chick skin: DAVIDSON **84**, 149
Topological approach
to computer modelling of cell division: RANSOM & MATELA **83 Supplement**, 233
Totipotency
in ICM of mouse expanding blastocyst: FLEMING, WARREN, CHISHOLM & JOHNSON **84**, 63
Transcription
and polyadenylation processes in quail embryos: OLSZAŃSKA, KLUDKIEWICZ & LASSOTA **79**, 11
of genes may be controlled by methylation: BIRD **83 Supplement**, 31
Transcriptional control
during infective pathways of bacteriophage lambda: BRAMMAR & HADFIELD **83 Supplement**, 75
in *Chlamydomonas* gene expression induced by flagellar regeneration: SCHLOSS **83 Supplement**, 89
in photoregulation in higher plants: ELLIS, GALLAGHER, JENKINS & LENNOX **83 Supplement**, 163
of chorion gene of *Drosophila*: KALFAYAN, WAKIMOTO & SPRADLING **83 Supplement**, 137
Transferrin
in cultures of rat conceptuses: HUXHAM & BECK **84**, 203
role in differentiation of mouse embryonic kidney: THESLEFF & EKBLOM **82**, 147
Transfilter tissue recombinations
study of epithelial induction of osteogenesis in chick embryo mandible: VAN EXAN & HALL **79**, 225
Translation
and stability of injected mRNA in mouse oocytes and ova: EBERT, PAYNTON, McKNIGHT & BRINSTER **84**, 91
Triploid cells
in supernumerary limbs of axolotl: MADEN & MUSTAFA **84**, 233
Trophectoderm
differentiation in isolated early mouse ICMs in culture: NICHOLS & GARDNER **80**, 225
processes regulate ICM totipotency expression in mouse blastocysts: FLEMING, WARREN, CHISHOLM & JOHNSON **84**, 63
Troponin-T
accumulation and localization in heart of *Ambystoma*: FULDNER, LIM, GREASER & LEMANSKI **84**, 1
Turtle
embryo
somitomeric organization of the segmental plate: PACKARD & MEIER **84**, 35

***Vanessa* species**
colour pattern modification by coldshock: NIJHOUT **84**, 287

Vibrissae
dermal papilla cell aggregative behaviour *in vivo* and *in vitro*: JAHODA & OLIVER **79**, 211
early development of whiskers in the mouse embryo: WRENN & WESSELLS **83**, 137
effects of wounding on hair growth: JAHODA & OLIVER **83**, 81
Vimentin
intermediate filaments in *Xenopus* stained by anti-vimentin antibodies: GODSAVE, ANDERTON, HEASMAN & WYLIE **83**, 169
Visceral yolk sac
of rat in organ culture: LU, SOBIS, VAN HOVE & VANDEPUTTE **80**, 127
Visual streak
formation in the frog *Limnodynastes*: COLEMAN, DUNLOP & BEAZLEY **83**, 119
Visual staining
of chick optic cup – evidence for new necrotic area: GARCÍA-PORRERO, COLVÉE & OJEDA **80**, 241
Vitamin A
effect on pattern formation in axolotl blastema: HOLDER & REYNOLDS **79**, 165

Wheat
gibberellins and gene control in aleurone cells: BAULCOMBE, LAZARUS & MARIENSSEN **83 Supplement**, 119
Whiskers
early development of mystacial vibrissae in the mouse: WRENN & WESSELS **83**, 137
Wing bud
chick
motor innervation after proximal reversal: LAING **83**, 213
development of apical ectodemal ridge in chick: TODT & FALLON **80**, 21
induction in chick embryos: CARRINGTON & FALLON **84**, 19
Wound healing
in rat embryos – scanning electron microscopy: SMEDLEY & STANISSTREET **83**, 109
Wounding
effects on hair growth in the rat: JAHODA & OLIVER **83**, 81
JAHODA & OLIVER **83**, 95

Xenopus laevis
egg
cytoplasmic rearrangements after fertilization of inverted eggs: NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
diploid gynogenesis and localization of periodic albinism gene: THIÉBAUD, COLOMBELLI & MÜLLER **83**, 33
egg
structural basis of activation wave: TAKEICHI & KUBOTA **81**, 1
embryo
intermediate filaments react with anti-mammalian vimentin antibodies: GODSAVE, ANDERTON, HEASMAN & WYLIE **83**, 169
froglet
effects of radius-ulna removal on forelimb regeneration: KORNELUK & LIVERSAGE: **82**, 9
haemolytic antibody response during postmetamorphic development: LALLONE, CHAMBERS & HORTON **84**, 191
larva
fibre order in normal optic tract near the chiasma: FAWCETT, TAYLOR, GAZE, GRANT & HIRST **83**, 1
oocyte
appearance and distribution of cytokeratin-containing filaments: GODSAVE, WYLIE, LANE & ANDERTON **83**, 157
intermediate filaments react with anti-mammalian vimentin antibodies: GODSAVE, ANDERTON, HEASMAN & WYLIE **83**, 169
role of glycoconjugates in migration of germ cells: DELBOS, GIPOULOUX & SAIDI **82**, 119
thymus implantation and antibody responses: GEARING, CRIBBIN & HORTON **84**, 287
X-inactivation mosaics
investigation of variability: WEST, BÜCHER, LINKE & DÜNNWALD **84**, 309

Yeast
heat shock – a comparison with *Drosophila*: LINDQUIST **83 Supplement**, 147
Yolk platelets
distribution in inverted *Xenopus* eggs following fertilization: NEFF, WAKAHARA, JURAND & MALACINSKI **80**, 197
Yolk sac
activity in cultured rat embryos: HUXHAM & BECK **84**, 203
Yolk sac endoderm
expression of apolipoprotein in the mouse: SHI & HEATH **81**, 143
